

Additions et soustractions de dizaines entières à un nombre:

Calcule les additions:

$14 + 10 = \dots\dots$

$25 + 10 = \dots\dots$

$31 + 10 = \dots\dots$

$49 + 10 = \dots\dots$

$16 + 10 = \dots\dots$

$28 + 10 = \dots\dots$

$10 + 34 = \dots\dots$

$10 + 47 = \dots\dots$

Calcule les soustractions :

$14 - 10 = \dots\dots$

$24 - 10 = \dots\dots$

$29 - 10 = \dots\dots$

$48 - 10 = \dots\dots$

$56 - 10 = \dots\dots$

$37 - 10 = \dots\dots$

Bonus (pour ceux qui sont en forme !):

$4 \text{ d } 3 \text{ u} + 1 \text{ d} = \dots\dots \text{ d } \dots\dots \text{ u}$

$1 \text{ d } 4 \text{ u} + 3 \text{ d} = \dots\dots \text{ d } \dots\dots \text{ u}$

$5 \text{ d } 7 \text{ u} - 1 \text{ d} = \dots\dots \text{ d } \dots\dots \text{ u}$
